INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2004/002904

Re Item III

Claims 18-21, and 23-26 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reference is made to the following documents:

D1: WO 01/66546

- 1) The subject-matter of present claims 1-29 is new (Article 33(2) PCT, cf. below).
- 2) The subject-matter of claims 1-29 does not involve an inventive step (Article 33(3) PCT).

The closest prior art is represented by D1 relating to alpha 7-nicotinic acid receptor binding agents for treating and preventing dementia (e.g. Alzheimer's disease), cognition disorders, anxiety, depression, schizophrenia, epilepsy, pain, Tourette's syndrome, Parkinson's chorea or Huntington's disease (cf. abstract and pages 111-131).

The present compounds differ from the compounds of D1 in the residue -Ar¹-A-Ar² comprising two (hetero)aromatic rings whereas the corresponding residue Ar of D1 is more generically defined as substituted phenyl or optionally substituted aromatic heterocyclyl or bicyclic carbocyclyl.

Consequently, the subject-matter of claims 1-16 and 22 consists in the selection of a subgroup of the compounds described in document D1. Such a selection can only be regarded as inventive, if the subgroup presents unexpected effects or properties in relation to the rest of the range. However, no such effects or properties are indicated in the application. Hence, no inventive step is present in the subject-matter of claims 1-16 and 22.

The claims 17-21 and 23-29 would only involve an inventive step if the product claims fulfilled the said requirement.
